Intelsat Earns a Spot on 2010 InformationWeek 500 List of Top Technology Innovators across America

Leading satellite operator recognized for its use of strategic technologies to improve the effectiveness of satellite control systems

Monarch Beach, CA, September 15, 2010 - Intelsat, the world's leading provider of fixed satellite services, made this year's InformationWeek 500, an annual listing of the nation's most innovative users of business technology. The 2010 list was revealed last night at a gala awards ceremony at the exclusive InformationWeek 500 Conference taking place at the St. Regis Monarch Beach Resort, Dana Point, CA.

"We are proud to be recognized among these prestigious companies for our technological excellence. Intelsat has strategically invested in technologies that further strengthen our industry-leading satellite operations systems, including virtualization of our servers and storage in our satellite operations centers. As a result, we have improved our internal operations and the services we deliver worldwide for our customers," said Greg Marlow, Intelsat's Senior Director, Satellite Control Systems.

"For 22 years, the InformationWeek 500 has honored the most innovative users of business technology," said InformationWeek Editor In Chief Rob Preston. "As we start to emerge from the worst recession in decades, the IT focus is now on driving growth—new sources of revenue, new relationships with customers, even new business models. This year's ranking placed special emphasis on those companies and business technology executives leading that charge."

InformationWeek identifies and honors the nation's most innovative users of information technology with its annual 500 listing and also tracks the technology, strategies, investments and administrative practices of America's best-known companies. Top winners have included: CME Group, Conway, National Semiconductor, Kimberly-Clark, Hilton Hotels and Unum. The InformationWeek 500 rankings are unique among corporate rankings as it spotlights the power of innovation in information technology, rather than simply identifying the biggest IT spenders.

Additional details on the InformationWeek 500 can be found online at www.informationweek.com/iw500/.

About Intelsat

Intelsat is the leading provider of fixed satellite services worldwide. For over 45 years, Intelsat has been delivering information and entertainment for many of the world's leading media and network companies, multinational corporations, Internet Service Providers and governmental agencies. Intelsat's satellite, teleport and fiber infrastructure is unmatched in the industry, setting the standard for transmissions of video, data and voice services. From the globalization of content and the proliferation of HD, to the expansion of cellular networks and broadband access, with Intelsat, advanced communications anywhere in the world are closer, by far.

About InformationWeek Business Technology Network (<http://www.informationweek.com/>)

The InformationWeek Business Technology Network provides IT executives with unique analysis and tools that parallel their work flow – from defining and framing objectives through to the evaluation and

recommendation of solutions. Anchored by InformationWeek, the multimedia powerhouse that looks across the enterprise, the network scales across the most critical technology categories with online properties like DarkReading.com (security), IntelligentEnterprise.com (application architecture), NetworkComputing.com (networking and communications) and PlugintotheCloud.com (cloud computing). The network also provides focused content for key IT audiences, such as CIOs, developers, SMBs and IT Support Managers via InformationWeek Global CIO, Dr. Dobb's, InformationWeek SMB, and HDI respectively, as well as vital vertical industries with InformationWeek Financial Services, Government and Healthcare sites. Content is at the nucleus of our information distribution strategy, and the network provides a deep and rich portfolio of decision-making tools and peer based research through InformationWeek Analytics, the leading service for peer-based IT research and analysis. IT professionals turn to our experts and communities to stay informed, get advice and research technologies to make strategic business decisions. The InformationWeek Business Technology Network is part of UBM TechWeb.
