### **Prominent Attorney, Former White House Aide, Joins Intelsat as General Counsel**

Pembroke, Bermuda, 15 February 2005 – Global satellite provider Intelsat announced that Phillip Spector, a well-known Washington attorney, has today joined the company as its Executive Vice President and General Counsel. Mr. Spector joins Intelsat from the international law firm of Paul, Weiss, Rifkind, Wharton & Garrison LLP, where he was the managing partner of the Washington office and the Chairman of the firm's Communications & Technology Group.

Mr. Spector has a strong background in the satellite sector, having represented over his years in private practice not only Intelsat, but also other major satellite operators, including SES Global and PanAmSat. He has also been retained by large users of satellite capacity, and by major satellite manufacturers. A few years ago, a legal publication named him "the leading satellite specialist in Washington," and he has been profiled for his "skilled legal work" in *American Lawyer*.

Conny Kullman, the Chairman of the Board of Intelsat, Ltd. said: "We are delighted that a lawyer of Phil's caliber has decided to join Intelsat at this exciting time in the company's history. Phil's wealth of knowledge of international telecommunications issues, and his extensive experience in the Washington political and regulatory arenas, makes him particularly well-suited to guide our company's legal, regulatory and government affairs activities on a global basis."

Mr. Spector, the former Chairman of the American Bar Association's International Communications Committee, said: "I am pleased to be part of the team at Intelsat, a company known throughout the communications industry for its flexible and diverse satellite fleet and strong global presence. With the new ownership group in place, the company is poised to remain a leading innovator in serving its customers with cutting-edge communications solutions."

Mr. Spector graduated from Harvard University, where he received a master's degree in public policy and a law degree, *magna cum laude*, and where he was an editor of the *Harvard Law Review*. Mr. Spector clerked on a federal appeals court and for Justice Thurgood Marshall of the U.S. Supreme Court, before serving in the White House from 1978 to 1980 as Associate Assistant to the President. He has written many articles on satellite and communications issues, and is the co-author of a book, *Communications and Technology Alliances*.
