GlobeCast WorldTV Renews Contract with Intelsat for IA-5 Capacity to Support Growth of International TV Distribution Platform

Pembroke, Bermuda, 26 January 2006 – Intelsat today announced that GlobeCast WorldTV has recommitted to a long-term, multi-transponder contract for Intelsat-Americas 5 (IA-5) satellite capacity to support the substantial growth of its international television distribution platform over North America. IA-5, located at 97°W, hosts one of the largest neighborhoods of international video programming in the U.S. and has been home to GlobeCast WorldTV since 1998.

GlobeCast WorldTV, a subsidiary of GlobeCast, is the leading aggregator and distributor of premium international television and radio channels in North America for delivery via direct-to-home (DTH), cable, IPTV, hotels, multiple dwelling units (MDU's) and commercial establishments. More than 161 WorldTV television and radio channels originate from Europe, the Middle East, Asia, Africa and the Americas, and represent 41 countries in over 33 languages, offering a unique line-up of native homeland programming as well as original in-language programming tailored for U.S. audiences.

GlobeCast WorldTV, a long-time Intelsat customer, has renewed its service agreements on IA-5 to accommodate the long-term and growing capacity requirements of its programmers.

"Through Intelsat and its IA-5 partners, a new channel entering the U.S. market can access a full range of services that allows them to immediately start operation and access a significant and increasing North American viewer base," said Jon Romm, President, Media Services at Intelsat. "Our relationship with GlobeCast has remained strong because Intelsat allows them to directly access hundreds of thousands of U.S. homes, and gives them the flexibility and room for continued growth as new channels are added to the WorldTV platform."

Lisa Coelho, Vice President, GlobeCast WorldTV, stated, "GlobeCast WorldTV's renewal on IA-5 confirms our long-term growth outlook for international television distribution in America. Intelsat is extremely supportive of our development needs and the IA-5 satellite offers us the versatility we need to reach the broad audience and diverse outlets for our programming."
