

MyIntelsat

The All Access Pass to your Intelsat services

MyIntelsat is our customer extranet that enables you to better manage the services you receive from Intelsat. The website provides value-added content and tools, keeps you informed, and increases the convenience of doing business with Intelsat.

Features to help you manage your portfolio of services

Transponder Services

MyIntelsat provides a secure access to your company's Services Portfolio with Intelsat. Look up important information by Service Order Number or Contract and determine the satellite, its orbital location and beams. Stay informed by finding out contract end dates and monthly recurring charges for your services.

Your Transmission Plan

With this application, customers can view their current frequency plan, which is based on the customer's transmission plan and Intelsat's calculated transmission parameters.

Commitment Management Report

Check out your committed Carriers and Channels with Intelsat. You can obtain general information or service specific information with financial and capacity information per committed carrier and channel.

Customer Invoices

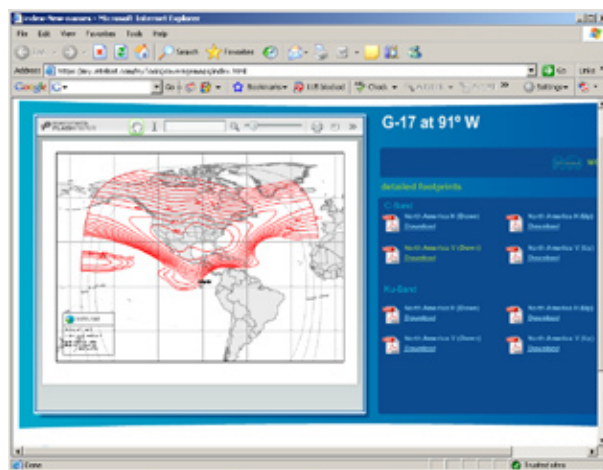

Your invoice details are available on MyIntelsat for your immediate review. The invoice history is available for 36 months.

Monitoring your GXs Services

Customers can view both the forward and return Internet traffic reports in a graphical form for their GXs Internet Trunking services.

Lease Transmission Plan Program (LST5)

Customers can generate satellite transmission plans with the downloadable link budget tool on ALL of the satellites in our fleet! LST5 incorporates current Intelsat satellite performance data to generate transmission plans, and to determine optimum HPA and earth station size requirements.

BENEFITS AT A GLANCE

- Easy access to all of your Intelsat provided services
- Customer-exclusive satellite tools and calculators relevant to your satcom needs
- Keeps you informed with business case studies, white papers, event information and more!
- Provides you with proprietary views to satellite performance data, capacity availability and transponder frequency layouts

My
Intelsat
Work Smarter

Detailed Satellite Coverage Maps

Explore full color uplink and downlink composite satellite footprint diagram libraries for any beam on operational and planned Intelsat satellites for each orbital location.

Earth Stations Registration

Use the online registration tool and receive the new antenna code within minutes of properly completing the online registration. The online registration tool is easy to use, and ensures the integrity of the data specified to facilitate management of accurate and complete Earth Station and Antenna data.

Intelsat Earth Station Standards (IESS)

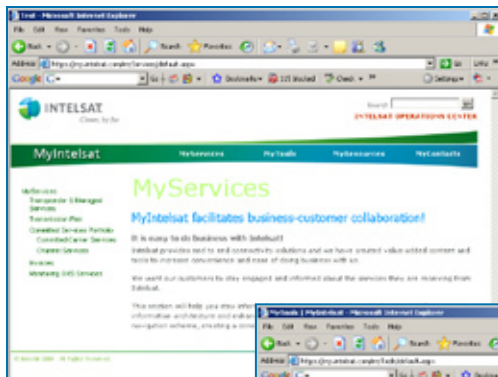

Published by Intelsat, the Earth Station Standards provides you with a common source of reference for performance characteristics required from earth stations and associated equipment for access to the space segment, as well as the establishment of communication links.

Look Angle Calculator

Intelsat developed the Azimuth Elevation Calculator Utility to help customers convert geodetic longitude and latitude coordinates of an earth station to satellite azimuth and elevation coordinates, given a geo-stationary satellite location and vice versa.

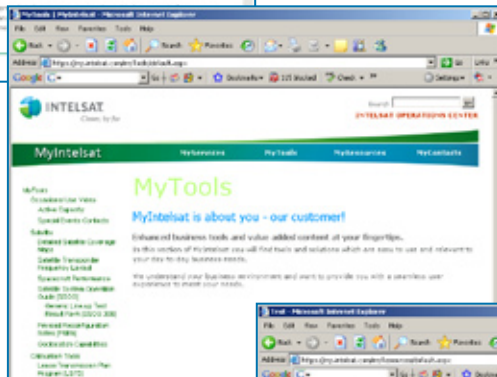

Satellite Operational Configuration

Review the most up-to-date data operational configuration documents, providing a variety of satellite operational data. The document has information on the nominal frequency, polarization, use, the satellite antenna used to transmit the beacon and whether the beacon is on or off. It also provides the configuration of all transponders, including up-link beam, frequency channel, saturation flux density (SFD) at beam edge, channel bank and the down-link beam.

MyServices – manage your services

Services Portfolio, Channel and Carrier Reports, Committed Carrier, Invoices, GX5 Reports

MyTools – online and downloadable resources

Occasional Use Video - Active Capacity, Satellite Tools and Services, Calculation Tools

MyResources – communication in one location

Service Handbooks, Whitepapers, Case Studies, Customer Newsletters, News Releases, Tradeshows and Events, Contract Terms and Service Descriptions, Carrier Service Order Forms

Who should sign up for MyIntelsat?

- Teleport Operators
- Program Managers
- Engineers
- Contracts Managers
- Decision Makers
- Accounts Payable
- Legal
