

Intelsat's Integrated Customer Premise Equipment (CPE) Program meets your unique satellite network needs by delivering pre-approved, pre-negotiated equipment, installation and maintenance solutions worldwide. The CPE Program serves as your direct link to vendors, installers and integrators on a regional and global basis.

The right equipment. The right solution. The right choice.

## Customer Premise Equipment (CPE)

### Dedicated team

Intelsat has a dedicated CPE team focusing on all your infrastructure requirements for Broadband, Cellular, Corporate Networks, Internet, Video, Voice and Data, and Voice-over-IP. We provide you with expert consultancy, facilitation and project management on a regional and global basis.

### Program Advantages

- **Reduced Costs** – We optimize networks and pass on pre-negotiated pricing from volume agreements with vendors, to you, minimizing your out-of-pocket expenses.
- **High Quality** – Our rigid earth station equipment and transmission standards ensure link performance and network configurations meet your design criteria.
- **Scalable** – We grow with you – you can purchase equipment and service incrementally. Our CPE team can discuss your current and future needs and recommend the solution that best meets your timetable and budget.

### Leadership through example

Since 1964, Intelsat has been bridging the digital divide. We offer a complete range of wholesale global satellite services with unsurpassed quality and reliability. Our customers include some of the world's largest telecom carriers, broadcasters, corporate network and Internet service providers. Intelsat is the first choice in satellite.

### Global connectivity.

With capacity on 51 satellites in prime orbital locations, access to a global network of earth stations, and local partners in over 200 countries, Intelsat can transmit your information to and from virtually anywhere.
