

Intelsat Video Fiber Network

The Intelsat Video Fiber Network is a network built for broadcasters from the ground up. With full flexibility of throughput options for standard definition (SD) and high definition (HD) transmission, Intelsat Video Fiber is ideal for unidirectional, long-haul intercity transport of sporting, entertainment and news events. Intelsat Video Fiber provides you with door-to-door content transport in first generation and unsurpassed, seamless interconnectivity to the world through our global satellite network.

Reliability and Certainty

When you choose Intelsat Video Fiber, you are selecting a broadcast-specific solution built for peace of mind. We've deployed industry leading technologies for video compression and transport across all our network PoPs. Best of all, you'll have a proven and financially stable partner working with you every step of the way for superior support and service.

Flexibility and Versatility

Through Intelsat Video Fiber, you are assured of both flexibility and scalability when it comes time to support any of your transmission needs. The Intelsat Video Fiber Network fully supports both SD and HD transmissions and accepts hand-off of content in either analog or digital formats. The Intelsat Video Fiber also provides you with seamless connectivity to the Intelsat satellite and teleport network.

Superior Service

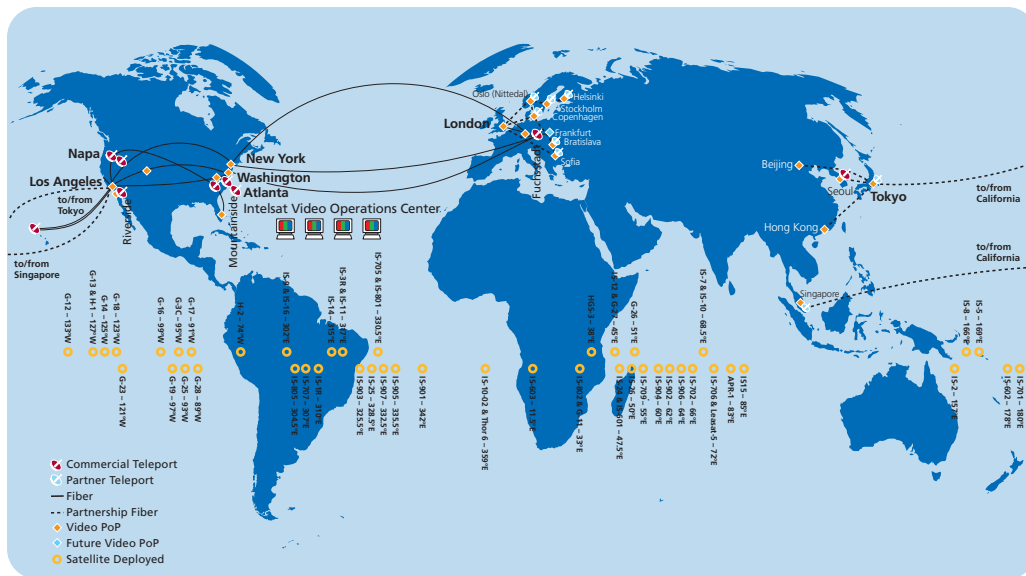

With the Intelsat Video Fiber Network as your solution and Intelsat as your partner, you are assured of receiving world-class service and support. Through Intelsat's Global Scheduling and Video Operations Centers, you will have a 24/7 point of contact for booking, billing, provisioning, monitoring and troubleshooting, and to answer any inquiry. You can also count on us for fast, remote switching and setup, quick response, and the ability to monitor each service in real-time as it transits the Intelsat Video Fiber Network.
