

## FlexGround

# Keeping Ground Forces Connected

Deployed ground teams require instantaneous access to secure, high data rate communications to ensure fast and effective decision-making.

FlexGround delivers ahead of competing solutions by providing superior data speeds, ease of use, pricing flexibility, enhanced security, and global coverage for ground forces.

### Performance

FlexGround delivers the high-performance connectivity required to meet simultaneous data, voice, and video needs with 6x greater capacity per beam than competitive offerings.

### Coverage

FlexGround leverages the full Intelsat network of more than 50 satellites, including the Intelsat Epic high-throughput satellite platform for multi-layered, worldwide coverage.

### Reliability

As the first fully managed, global Ku-band network, FlexGround enables access to always-on broadband capabilities to 90% of the world. And we're there to help 24/7.

### Service Implementation

Comms-On-the-Move (COTM) and ManPack offerings include antennas as small as 60cm, making them easy to transport. And they can be deployed in the field in minutes.

### Price

FlexGround offers flexible and affordable pricing, including a pay-as-you-go plan designed to fit individual needs. Up to five users can share a single subscription and pool data across terminals.

### Security

Enhanced anti-jamming capabilities ensure always-on connectivity, free of interference from hostile forces.

## FlexGround At a Glance

**10x**

Improved data throughput with speeds up to 10 Mbps forward and 3 Mbps return.

**6x**

FlexGround offers 6x greater capacity overall than competitive offerings.

**60cm**

Smaller receiving antennas mount easily to mobile platforms.

**5mins**

Deployment and connection can be completed quickly and easily.

**3hrs**

Manpack units are capable of hours of transmit time.

### Put FlexGround to Work:

Border control | Homeland security | Disaster recovery | C4ISR | Advanced team support

50+ wide and high-throughput spot beams deliver multi-layered, resilient capacity.

24/7 Secure Operations Center is there for users at any time.

Up to five users can share a single subscription and pool data across terminals.
