

# CellSat for Remote Broadcasting

## Flexible Connectivity for your Content

### Providing more Connectivity for Remote Broadcasting

Reliable connectivity is a challenge when broadcasting live from remote locations. With network congestion and location causing issues, it's hard to ensure you'll deliver the video quality that is expected. CellSat, offered in partnership with Dejero, is a portable, reliable, lightweight remote broadcasting solution that guarantees you'll have the bandwidth available to transmit broadcast-quality video in real time, on a fast, low latency network from virtually anywhere. To provide the reliability you need, cellular connectivity from multiple mobile networks is intelligently blended with Intelsat's Ku-band satellite connectivity providing you with the best of both transmission paths, combined into one.

### The Power to Transport Video

Build the right solution for your video needs using the following components:

#### Remote Mobile Transmission via EnGo

Encode high-quality video over IP with a compact, modular mobile transmitter. **EnGo** is ideal for mobile video contribution professionals in remote locations who require agility and versatility.

#### Adaptive Encoding and Transmission via PathWay

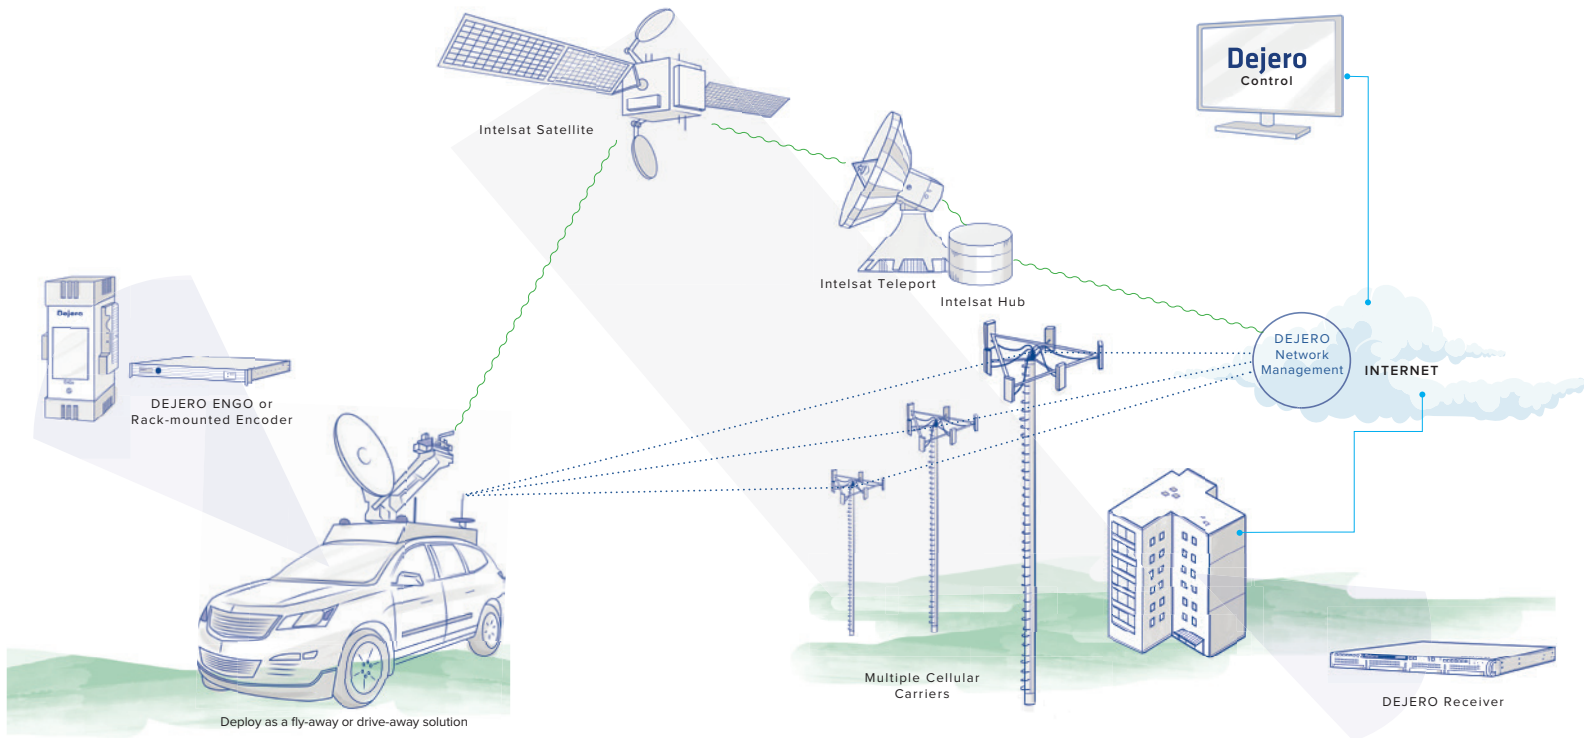

Deliver exceptional picture quality with low latency. **PathWay** is an adaptive bitrate encoder and transmitter designed for installation in news-gathering, in remote production vehicles, or in fixed locations.

#### Receiving via WayPoint

Reconstruct video transported over IP networks from EnGo, PathWay, and GoBox transmitters. **WayPoint** is a highly-reliable four-output receiver that is designed to seamlessly integrate with your existing broadcast infrastructure.

### Benefits At-A-Glance

- **High Reliability**  
Confidently deliver your live shot
- **Simplicity**  
Designed to easily be used in the field
- **On-demand**  
Available when needed, saving you time and enabling faster responses
- **Flexibility**  
Cellular and satellite, blended for your needs

## The Intelsat and Dejero Partnership

Intelsat, a world leader in providing integrated satellite communications, and Dejero, an innovator in blending IP networks for video transport and internet connectivity, have partnered to make content contribution easy. This collaboration provides broadcasters with new ways to reliably and flexibly transport their live and recorded video content.

### About Intelsat

As the foundational architects of satellite technology, Intelsat operates the largest, most advanced satellite fleet and connectivity infrastructure in the world. We apply our unparalleled expertise and global scale to reliably and seamlessly connect people, devices and networks in even the most challenging and remote locations. Transformation happens when businesses, governments and communities build a ubiquitous connected future through Intelsat's next-generation global network and simplified managed services.

At Intelsat, we turn possibilities into reality. Imagine Here, with us, at [Intelsat.com](http://Intelsat.com).
