

IronRoute for Media

A Revolution in Content Distribution

Intelligently Blend Your Connectivity Choices

Imagine moving your content anywhere in the world. Whether you're a broadcaster or a programmer, success is about delivering your content to as many viewers, in as many ways, on as many devices as possible. With IronRoute, you can reliably transmit broadcast-quality video in real time using a media focused software defined solution that offers blended connectivity access to the cloud. Built for scalability, with IronRoute, you can reach cloud-based tools and applications needed for more effective management and transport of content across your network while assuring broadcast continuity for your business. Manage your current connectivity, content, and distribution while future-proofing your needs of tomorrow.

Discover the Future of Video Distribution – Today

Cloud Access

Move your content reliably with the right cloud-based tools

Point to Multipoint

Quickly, easily, and cost-effectively distribute content to network affiliates, group stations, or to other broadcasters and media organizations

Improved Connectivity

Blend broadband, cellular (3G, 4G, 5G), and satellite connectivity to achieve the reliability you expect

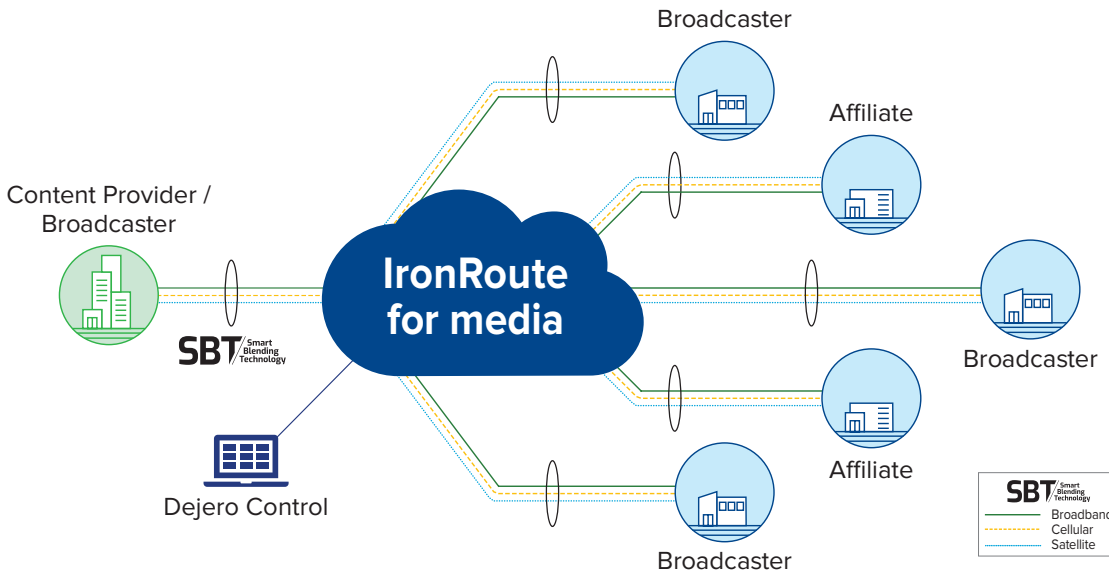

Content Management

Manage distribution from a web browser: drag, drop, and distribute

Benefits At-A-Glance

- **Global**
Available virtually anywhere you need to be
- **Flexible**
Bi-directionally move your content to multiple sites with greater agility and reliability
- **Service Quality**
Priority routing with a CIR and low latency access
- **Control**
Greater tools for content transport and management
- **One Stop Shop**
One place for all your needs: procurement, management and billing

Reliable, Cost-effective Content Distribution

The Intelsat and Dejero Partnership

Intelsat, a world leader in providing integrated satellite communications, and Dejero, an innovator in blending IP networks for video transport and internet connectivity, have partnered to make content contribution easy. This collaboration provides broadcasters with new ways to reliably and flexibly transport their live and recorded video content.

About Intelsat

As the foundational architects of satellite technology, Intelsat operates the largest, most advanced satellite fleet and connectivity infrastructure in the world. We apply our unparalleled expertise and global scale to reliably and seamlessly connect people, devices and networks in even the most challenging and remote locations. Transformation happens when businesses, governments and communities build a ubiquitous connected future through Intelsat's next-generation global network and simplified managed services.

At Intelsat, we turn possibilities into reality. Imagine Here, with us, at Intelsat.com.
