

Introducing Compact 45cm Antenna Class

Powered by Intelsat FlexMaritime

Small, affordable, easy-to-install maritime terminals bring fast data speeds to fishing, workboats, leisure and recreational vessels around the world.

- Compact and lightweight antennas are powered by the Intelsat global FlexMaritime network, a multi-layered high-throughput satellite (HTS) service that delivers high-speed, secure and reliable connectivity anywhere it's needed at sea.
- Delivers enhanced and reliable broadband connectivity to smaller commercial boats and recreational vessels that have limited space for communications equipment.
- The 45cm terminal represents the third antenna class for Intelsat FlexMaritime services, adding to the existing 60-90cm and 1m+ antennas in Intelsat's qualified portfolio.

Unmatched performance with global coverage

Multi-layered coverage provided by 140+ beams, optimized for HTS with wide beams supported

Speeds up to 6/2 Mbps (MIR only)

Compact terminals qualified on Intelsat FlexMaritime

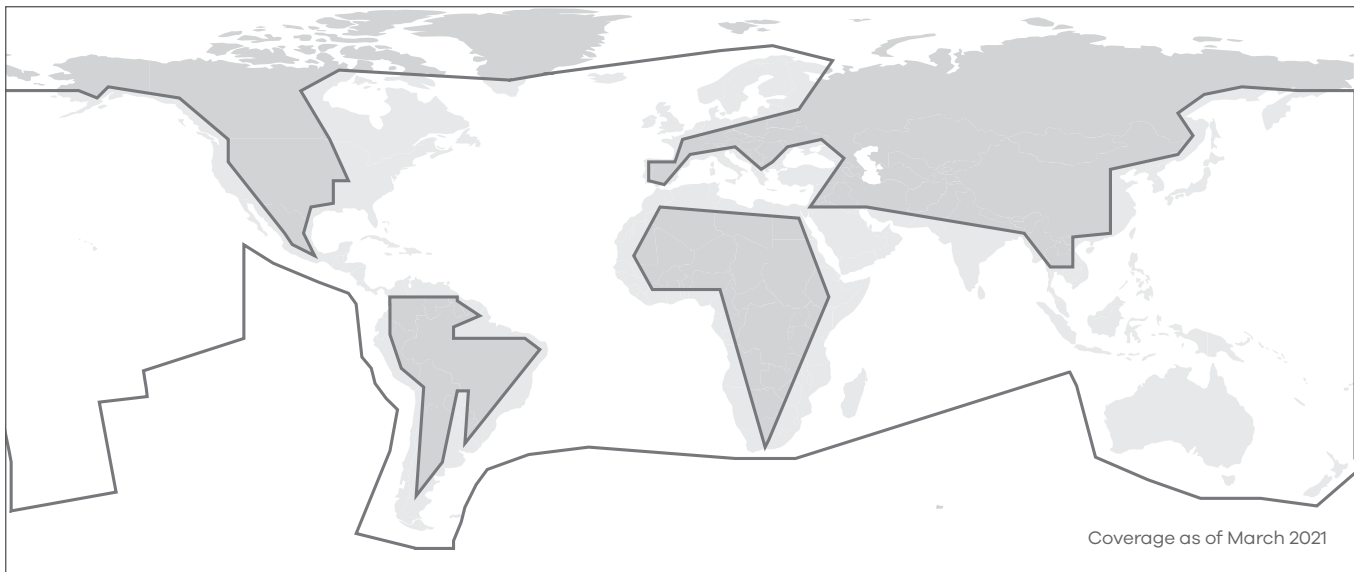

Choice of monthly or annual, gigabyte volume-based plans with no long-term commitments

Security you can trust, only satellite operator with independent SOC 3 certification

FlexMaritime 45cm Coverage

Offered Exclusively Through Our Solutions Partners

Offered through our carefully selected solutions partners, FlexMaritime can be seamlessly integrated with their innovative value-added services and world-class support to create the perfect solution for their customers.

Qualified FlexMaritime 45cm Antennas

Maritime solutions providers can purchase Intelsat-qualified 45cm terminals directly from KNS or Intellian, or from their distribution partners.

SPECIFICATIONS

Intellian v45C

ANTENNA APERTURE: 45cm (18")

WEIGHT: 23 kg / 50.7 lbs

BUC: 6W

ACU MODEL: Intellian (Integrated) or iQ200 modem integrated ACU

MODEM: x7, iQ200

PLATFORM: 4-Axis

ELEVATION ANGLE: -5° to +115°

KNS SuperTrack C4

ANTENNA APERTURE: 45cm (18")

WEIGHT: 27 kg / 59.5 lbs

BUC: 6W

ACU MODEL: Standard ACU or iQ200 modem integrated ACU

MODEM: x7, iQ200

PLATFORM: 4-Axis

ELEVATION ANGLE: +10° to +115°
