Global Network Connectivity Fabric

Deliver the Network Performance That Drives Growth

As use cases continue to grow for quality global connectivity, enterprises and service providers are adopting new technologies to extend consistent connectivity to every location, support resilient hybrid cloud and SD-WAN deployments, and drive the best application performance for users.

Harnessing the best network and technology options will position your business to meet the changing demands of customers. It's crucial for your ability to deliver reliable solutions that drive success across distributed enterprises.

FlexEnterprise: Your Global Enterprise Connectivity Fabric

With FlexEnterprise, you're ready to leverage the world's largest integrated satellite and terrestrial network to deliver quality service to virtually any location on the globe.

Quickly bring up new sites to extend access to the public internet, private networks, or cloud services

Increase application and site availability regardless of the state of the local telecom infrastructure

Improve application performance with diverse paths for traffic separation and app-specific routing

Fill gaps in your service footprint whether it's for one site or to cover an entire region

Even enterprises and integrators who are new to satellite can take advantage of FlexEnterprise. Pre-packaged FlexEnterprise Unlimited Plans make it easy for service providers to integrate the benefits of the seamless global Flex network into their solutions.

Hybrid WAN topologies have become the de facto option for WAN architectures for midsize and large enterprises

Benefits At-A-Glance

- Power new locations without the time or cost associated with new fiber, microwave, or other terrestrial deployments
- Satellite-as-a-service plans to integrate the global Flex network into your end-to-end solutions
- No wholesale commitments
- Resilient high-throughput capacity to individual sites, a multi-country region, or globally
- Expand the reach of SD-WAN and enterprise networks, enable access to the public internet, or deliver secure connectivity to the cloud with Intelsat Cloud Connect

Order Up Global Connectivity

Deliver the reach and reliability of FlexEnterprise connectivity without the need to manage wholesale satellite capacity. FlexEnterprise Unlimited Plans enable you to put the network where your users need it, with minimal capital costs and no capacity commitments. Intelsat's array of satellite-as-a-service options enable you to quickly deploy new sites and strengthen established sites across a global footprint.

With FlexEnterprise you can:

1

Increase Branch Office Resiliency

Reduce the business and productivity impacts of network downtime when you integrate the diverse, non-terrestrial Flex underlay network into your connectivity solutions. FlexEnterprise is unaffected by local network infrastructure issues and service interruptions, and the Flex platform is built on technology that delivers consistent connectivity regardless of local weather or climate.

2

Expand Geographic Availability and Reduce Time to Deploy New Sites

In areas still being built out with fiber or cellular infrastructure, Flex provides a "first in" solution so that you can quickly bring up new sites without waiting. FlexEnterprise enables you to fill gaps in your network coverage and even deliver quality connectivity where terrestrial network alternatives simply do not exist.

3

Improve Application Performance

Enhance SD-WAN benefits that leverage the performance of diverse transport networks to deliver a better user experience that derives more value from your underlay networks. FlexEnterprise provides a unique path for traffic separation and application-specific routing to maintain the performance of critical enterprise traffic.

Deliver More to Your Users

FlexEnterprise helps you streamline operations and deployment processes thanks to simple plans, standardized remote terminals, and uniform performance across the global Flex footprint. With pre-packaged FlexEnterprise plans, it's now easier than ever to make your network nimble and scalable, delivering a new level of reach, performance, and flexibility to support critical applications and drive business productivity.

About Intelsat

As the foundational architects of satellite technology, Intelsat operates the largest, most advanced satellite fleet and connectivity infrastructure in the world. We apply our unparalleled expertise and global scale to reliably and seamlessly connect people, devices and networks in even the most challenging and remote locations. Transformation happens when businesses, governments and communities build a ubiquitous connected future through Intelsat's next-generation global network and simplified managed services.

At Intelsat, we turn possibilities into reality. Imagine Here, with us, at Intelsat.com.
