

Intelsat FlexAir

Business jet connectivity built to a higher standard

Inflight Connectivity Engineered for Business Aviation

Intelsat FlexAir is a ubiquitous, multi-layered broadband satellite connectivity service that delivers a high-quality inflight internet experience. FlexAir is uniquely designed for business aviation and bandwidth is not shared with commercial aviation or consumer broadband customers. This means passengers can seamlessly connect to what matters most anywhere they fly.

Flexible and Scalable

FlexAir – a global, fully managed, high-throughput satellite (HTS) service – features multiple layers of coverage for added resiliency and redundancy. The ultimate passenger experience is achieved through our proven ability to connect everyone onboard even when routes or data demand shift unexpectedly.

Additionally, Intelsat remains at the forefront of cybersecurity. It is the only satellite operator certified by an independent auditor for Service Organization Control 3 (SOC 3) compliance, ensuring your communications are always secure while connected.

Offsite Should Never Mean Offline

The power of FlexAir ensures a consistent and reliable passenger experience across every device and application, regardless of how many jets are on the network. Passengers will experience unfettered applications while never worrying about staying connected. No matter what service plan you go with, FlexAir speeds are never throttled. The best passenger experience is achieved every time.

Benefits At-A-Glance

Strength, breadth and depth of a fully integrated, open architecture Ku-band ecosystem

Global coverage specifically committed to business aviation

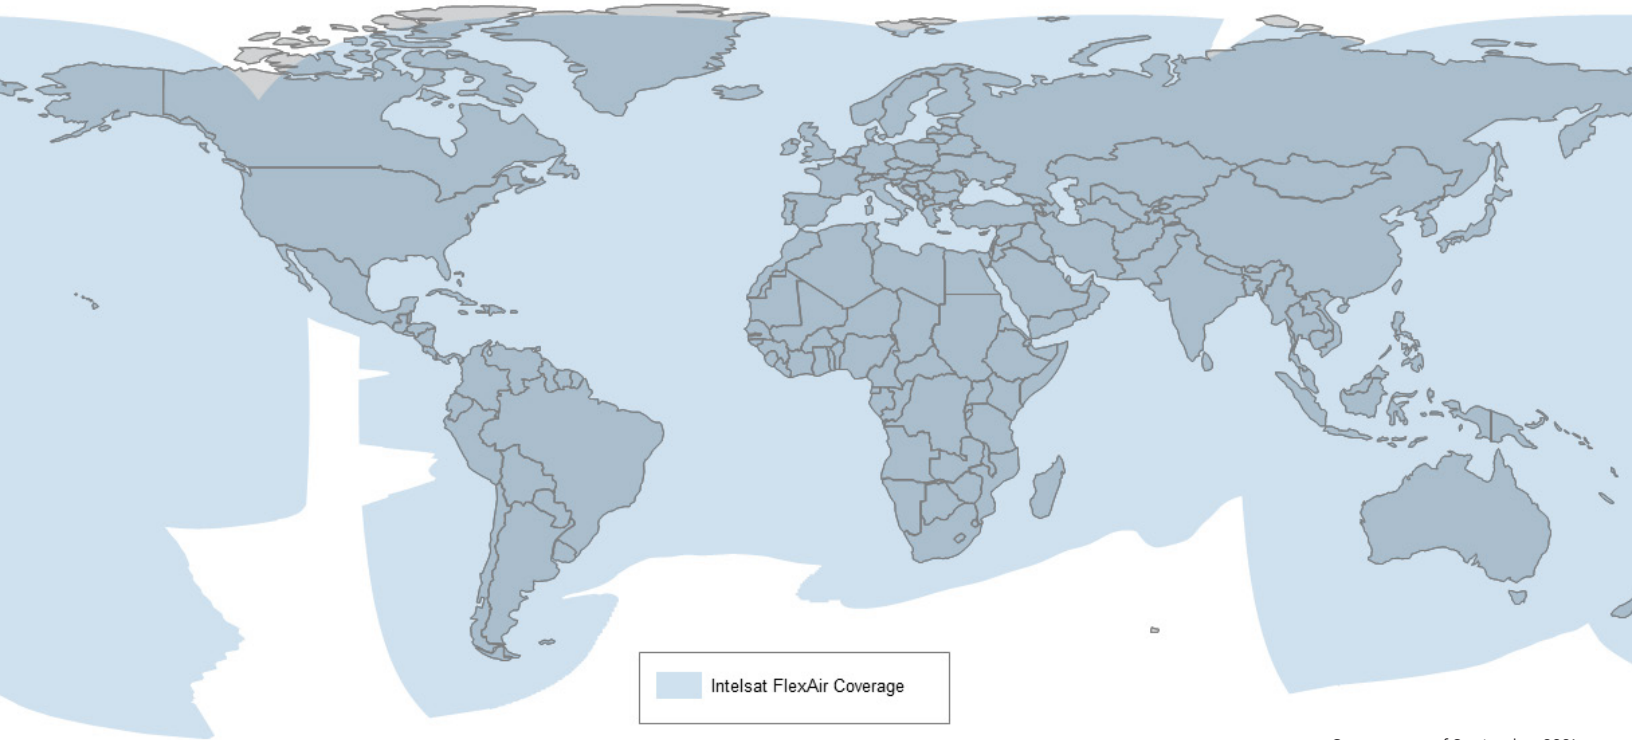

Up to 15/2 Mbps speeds supporting streaming cloud-based enterprise applications, email, voice and text

Industry-first service plan flexibility tailored to meet customer needs

FlexAir Coverage Map

Coverage as of September 2021

Simple, Customer-centric Service Plans

Select a data plan that meets your unique needs. No matter what you go with, FlexAir delivers the best possible experience and won't throttle or limit your internet speeds. Available in 'power by the hour' hourly billing plans, pay-as-you-go, and in unlimited service plans.

A Partnership Committed to Service Excellence

Together with Satcom Direct (SD), we are advancing inflight internet for business aviation through hassle-free, end-to-end managed solutions. Offered exclusively through SD, FlexAir has you covered no matter how your connectivity needs evolve.

Soar to Higher Heights with FlexAir

Grow with us as we launch new satellites and services. The construct of our next-generation network will be cloud-based, fully virtualized, and software-defined – delivering an unrivaled connectivity experience.
