## Enterprise Network Connectivity Reimagined

Reliably connect globally distributed locations as if they are across the hall with IntelSat FlexEnterprise.

An enterprise's network is key to enabling employees, streamlining operations, and seizing emerging opportunities. It's the foundation upon which modern enterprises build the applications and services that bring more value to customers and grow their business.

But how will service providers and integrators meet expectations for consistent, always-available, secure connectivity that enables users whether they're at HQ, a home office, or a remote branch?

### Stay connected. Stay productive.

**Business continuity across all enterprise locations**

**Seamless connection to IoT and edge computing**

**SD-WAN and hybrid networking for extra resiliency**

**Consistent service regardless of local connectivity options**

That's where IntelSat FlexEnterprise comes in.

## How FlexEnterprise Solves Network Challenges

FlexEnterprise is the service platform delivering speed, coverage, and reliability to companies of any size with branches near and far. Deliver the performance and flexibility you need to support emerging application needs and drive new revenue with nimble, scalable solutions.

**Challenge:**

Gaps in network coverage

**Solution:**

Deliver high-speed connectivity anywhere cost-effectively, with speed and agility

**Challenge:**

Applications need increased capacity

**Solution:**

Complement existing services to meet the unique needs of applications and end-users

**Challenge:**

Inconsistent connection

**Solution:**

Strengthen network access and enhance SD-WAN solutions for more flexibility and reliability

## FlexEnterprise Works for You. Here's How:

**If you need** a way to cost-effectively add high-throughput satellite connectivity to your portfolio, and are familiar with satellite management:

**FlexEnterprise gives you** control over your offering with a web-based platform so you can meet different customer demands and business models at your discretion

**How it works**

- Choose the service region(s) where you'll provide service.
- Choose the service plan with the right mix of committed and burstable capacity.
- Create services and packages to meet your customer needs and business goals through the comprehensive web portal.
- Deliver services to your customers while the IntelSat support team manages the satellite and ground network behind the scenes.

**If you need** a simple solution to fill gaps in a global network with the benefit of hands-on guidance:

**FlexEnterprise gives you** new or backup connectivity virtually anywhere without capacity commitments

**How it works**

- Choose a plan that provides the right mix of throughput and expected usage.
- Assign a plan to each location to meet its particular needs through the easy-to-use web portal.
- Deliver services to your customers while the IntelSat support team manages the satellite and ground network behind the scenes.

Improve the quality of service and user experience, reduce capital costs, and enable new services and revenue opportunities through the world's most nimble, scalable, and resilient global network. [Learn how FlexEnterprise can move your business forward.](#)
