

Take Your Video Anywhere

Global Hybrid Video Distribution Made Easy

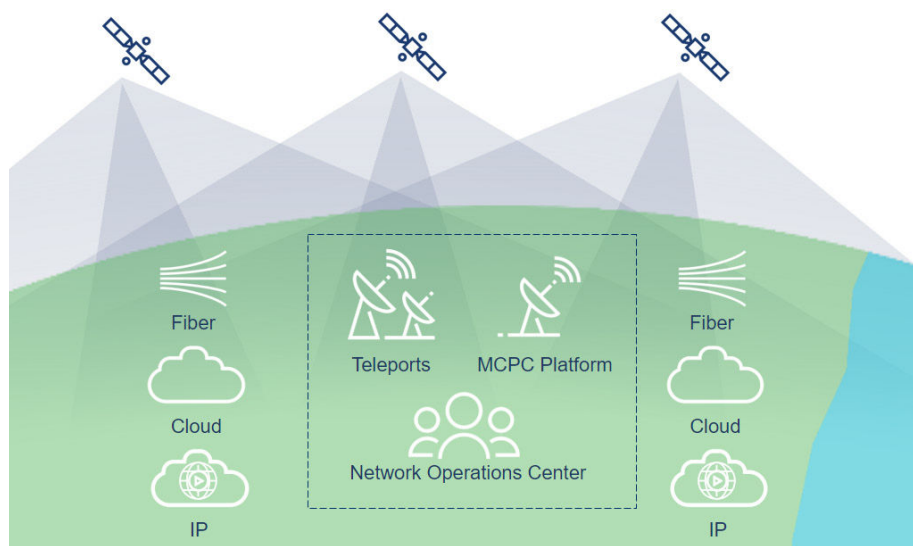

Capture and Keep Viewers

Content distribution is becoming increasingly more difficult as programmers struggle to meet the demands of viewers worldwide. With new forms of competition, and existing markets suffering from oversaturation, content providers are looking for new ways to retain their customer base, while trying to expand their current distribution in new geographic locations.

The Intelsat global media network enables content providers to distribute their videos globally and capture new viewers easily. With multiple forms of connectivity, ground infrastructure, and worldclass satellites for media, content providers can efficiently scale their channel distribution, while maintaining legacy markets.

Global Network, Managed End-to-End by Intelsat

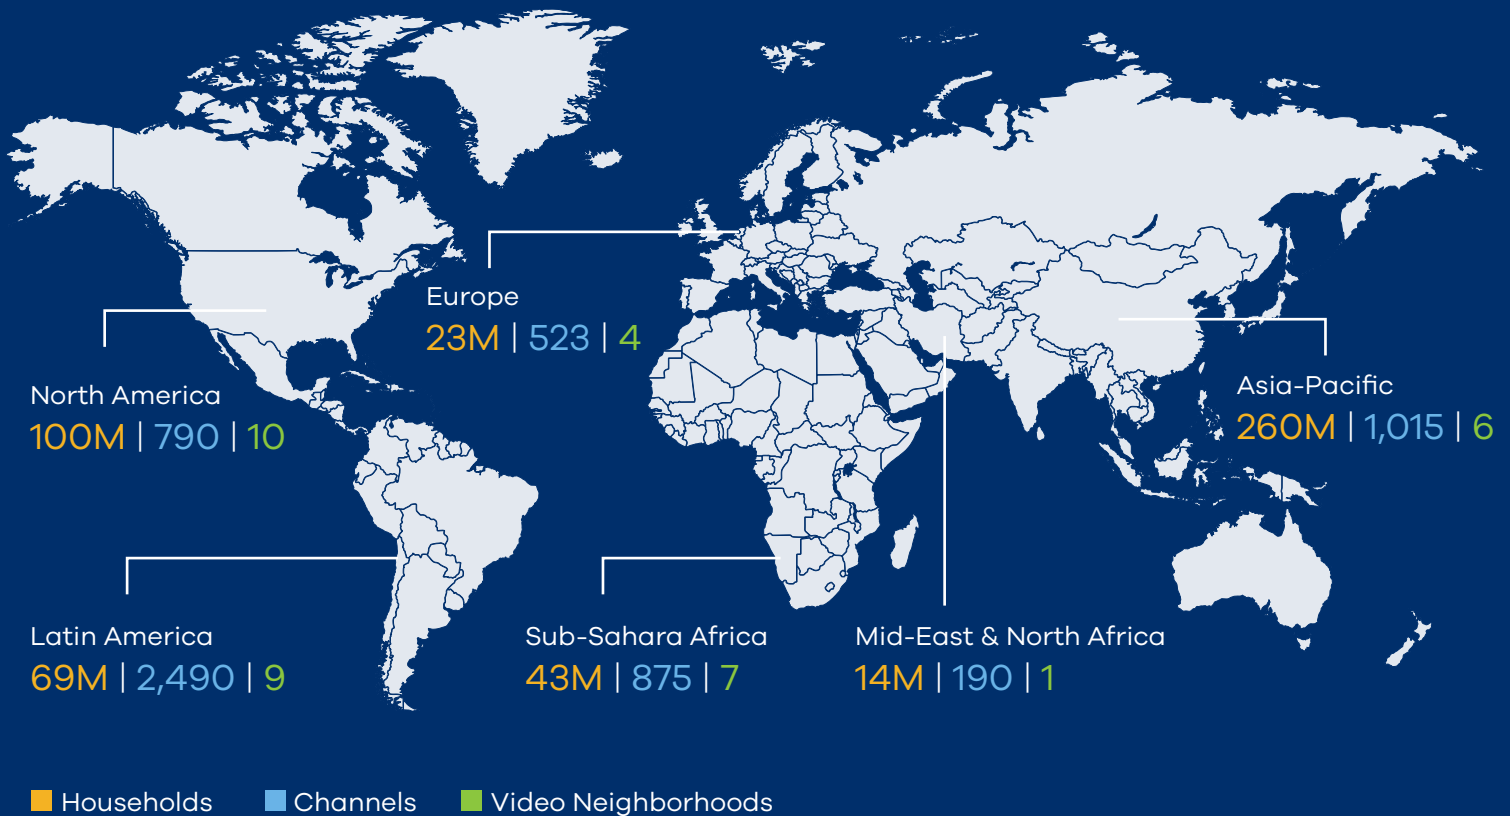

Intelsat can streamline operations with integrated network connections to our global fleet.

Benefits At-A-Glance

About Intelsat

Intelsat's global team of professionals is focused on providing seamless and secure, satellite-based communications to government, NGO and commercial customers through the company's next-generation global network and managed services. Bridging the digital divide by operating one of the world's largest and most advanced satellite fleet and connectivity infrastructures, Intelsat enables people and their tools to speak over oceans, see across continents and listen through the skies to communicate, cooperate and coexist. Since its founding six decades ago, the company has been synonymous with satellite-industry "firsts" in service to its customers and the planet. Leaning on a legacy of innovation and focusing on addressing a new generation of challenges, Intelsat team members now have our sights on the "next firsts" in space as we disrupt the field and lead in the digital transformation of the industry.
